# Background

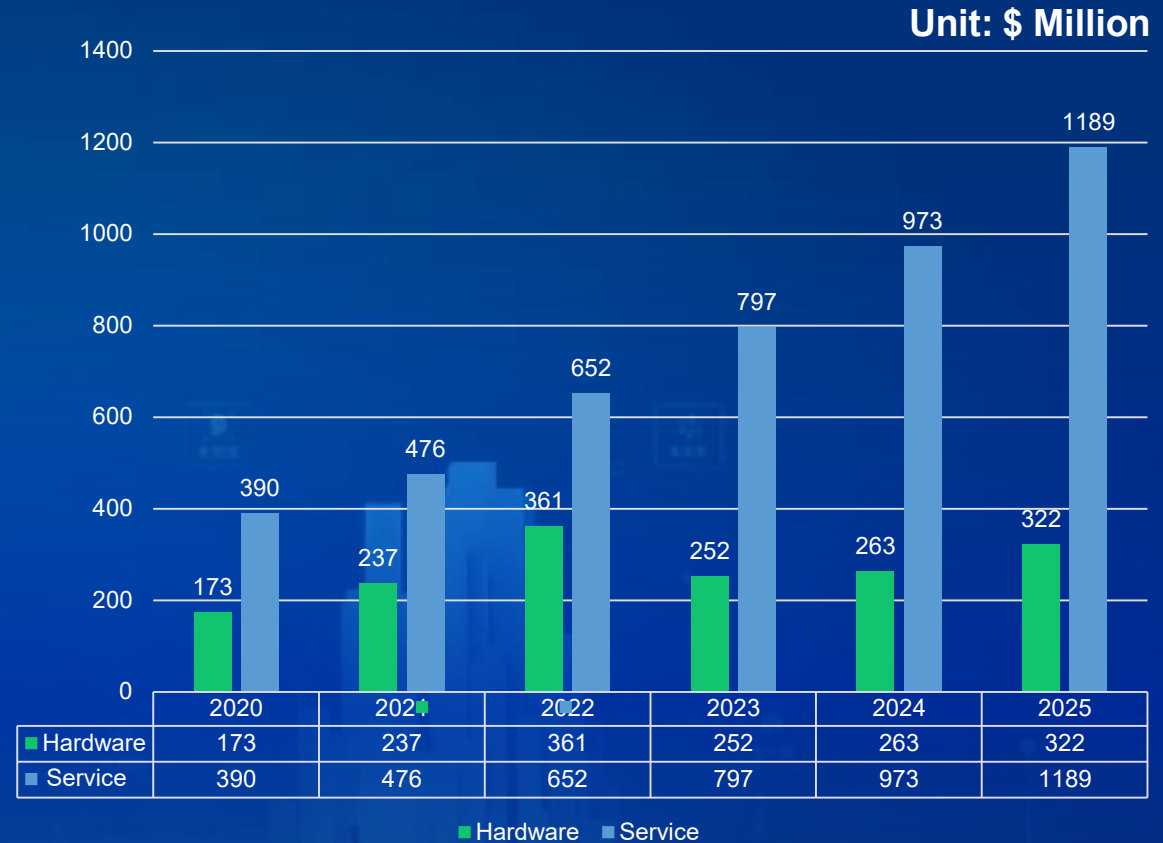

**120M Trucks**

The trucking industry is the lifeblood of the economy, with more than 120 million trucks transporting more than 60% of all freight worldwide

**Global Truck Video + Telemetry Market**  
 Estimated in 2025, the global demand will be 1.72 million units, with a market capacity of US\$1.51 billion.

(From: Frost&Sullivan)

# Background / tecnologia has matured, Enter the era of ai and data

## The Stage I

### GPS/OBD

- Location
- Speed
- Time of driving

## The Stage II

### CCTV

- Live view
- Record down loading
- Play back

## The Stage III

### AI Active Safety

- Active safety warning
- Driver Identification

## The Stage IV

### Data-driven Safety

- Driver dashboard
- Data Analysis

## The Stage V

### Autopilot

- Autopilot

# Challenges

## Business challenges of different roles in the trucking industry

Fleet

Driver

Insurance

Owner of goods

Supervisor

Proof of accident liability

Driver management

Efficient Fleet management

Prevent cargo theft

Proof of accident liability

Regular driving behavior

Prevent cargo and fuel theft

Identify false claims

High claim ratio

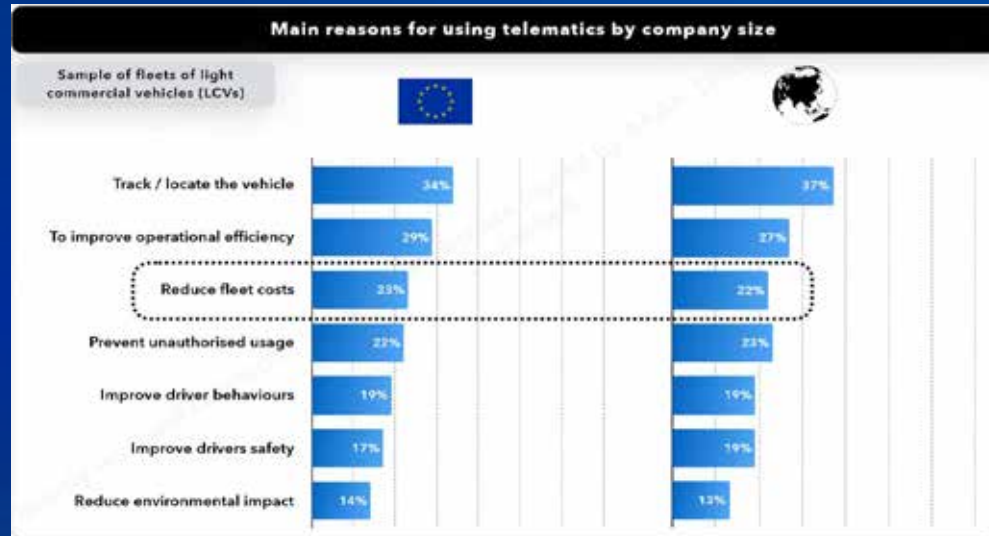

Reduce costs and differentiate competition

Cargo damage

Cargo theft

Road safety improvements

Accident investigation

The main reasons why light trucks use telematics services:

1. Vehicle positioning and tracking,
2. Improve operational efficiency,
3. Reduce fleet costs

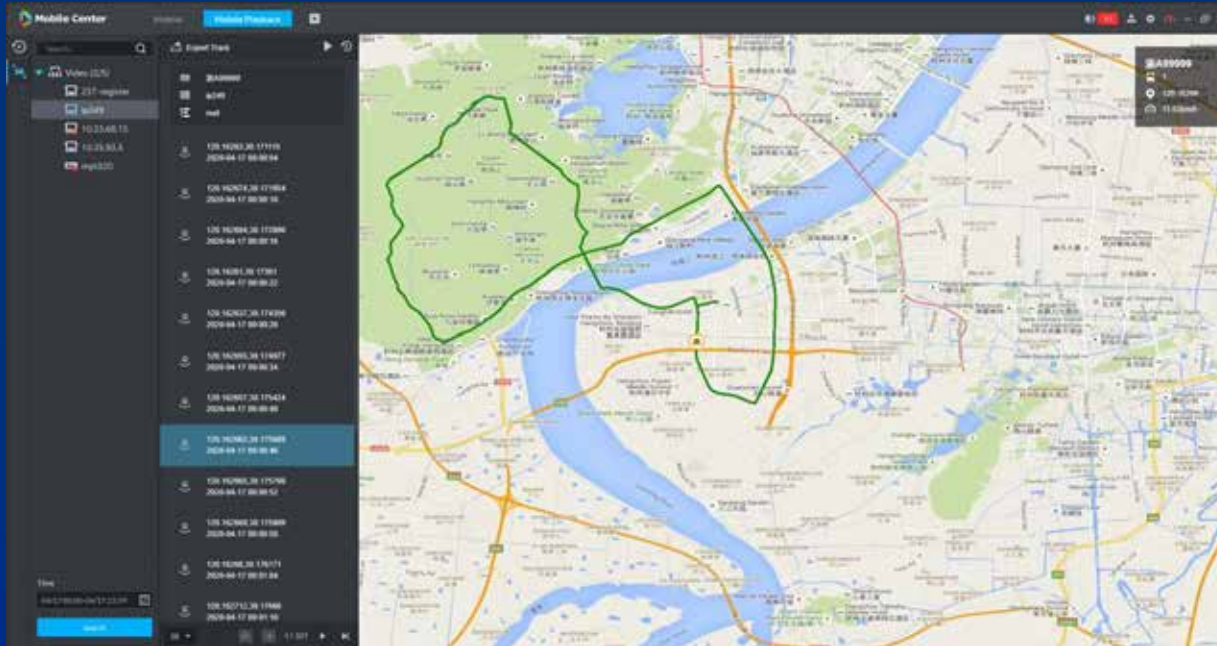

# Smart Truck Solution

- Background
  - Industry background
  - Challenge
- **Smart Truck Solution**
  - Fleet management
  - Improve safety
  - Cargo security
- Successful cases

# Fleet management / GPS Tracking

Real-time locating & Route Playback

## Global view of fleet

- Support remote real-time preview and playback of all on line buses
- Support to track the position of all the buses
- Real time event fast response and manage

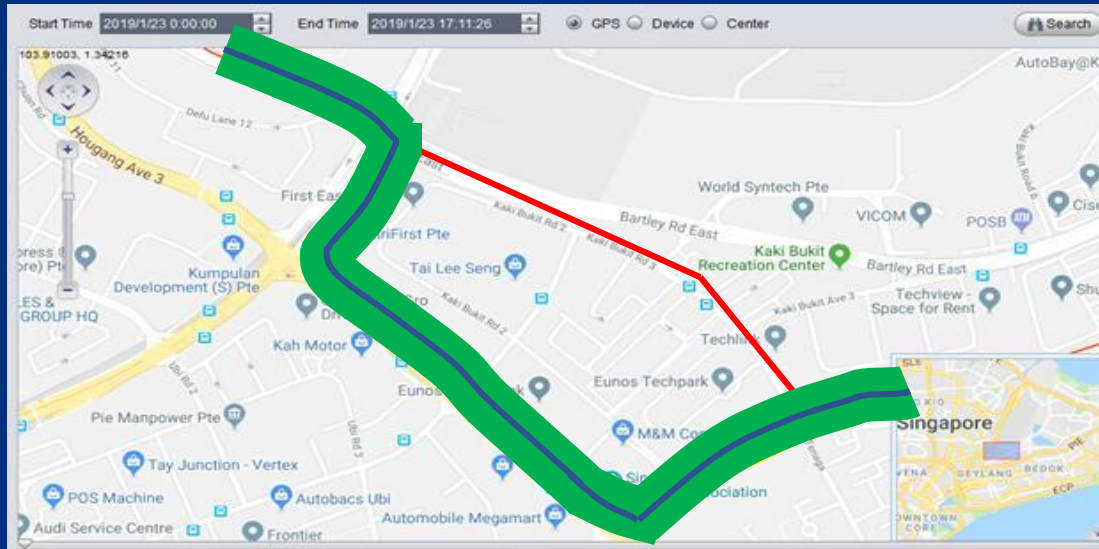

Operation dashboard

## Clear view of operation dashboard

- Vehicle online statistics
- Equipment failure statistics
- Mileage statistics

# Fleet management / Reduce costs

Prescribed area

Violation area

## Fuel Consumption Management

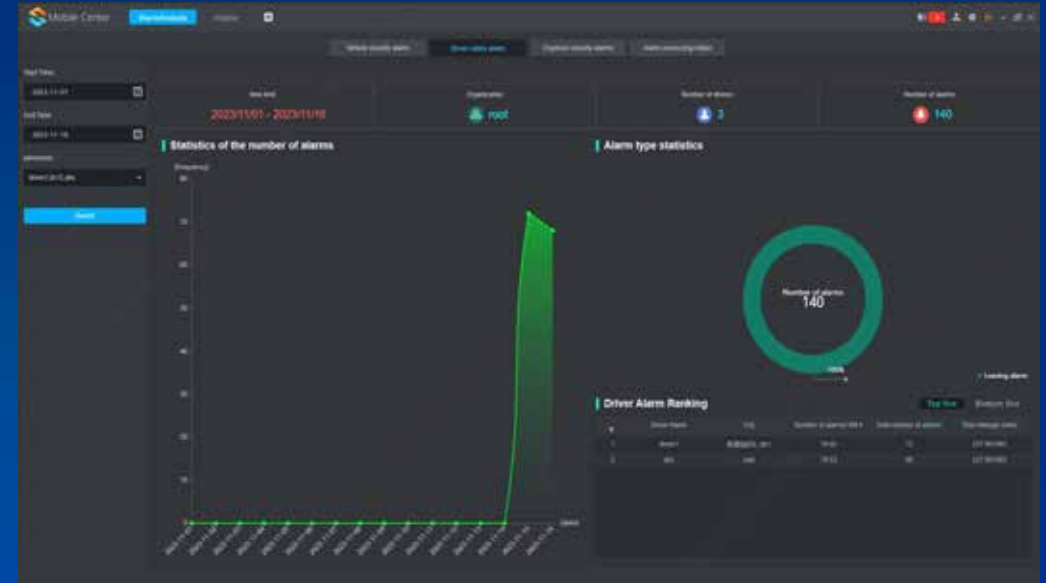

- Early warning of high fuel consumption driving behavior (idling for a long time, not driving according to the route)
- Uses ultrasonic waves to detect the fuel height and calculate consumption
- Generates reports for fuel consumption based on the mileage.

## Fleet management / Driver manage

### Driver Identification and overtime driving by face recognition

- Cameras for drivers Identification
- Count the continuous driving time of the same driver and trigger an alarm for overtime driving.

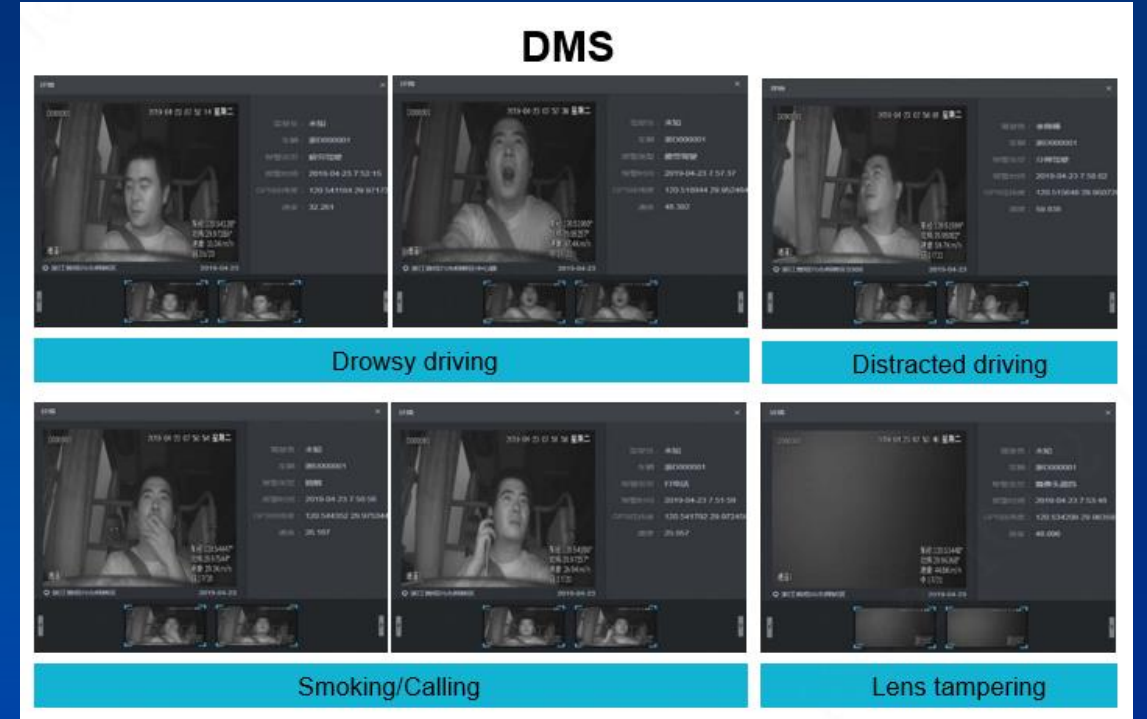

### Driver portrait dashboard

- Driving behavior statistics (alarm type distribution)
- 100 kilometers safe driving ranking
- Customizable for more dimensional statistical analysis

## Improve safety / DSM

## DSM

- Detect illegal driver behaviors, like look around, yawn, close eyes, smoke and make phone calls by DMS cameras
- When these behaviors happen, our system will warn the driver and upload the alarm to the control center as evidence, eventually to decrease accidents

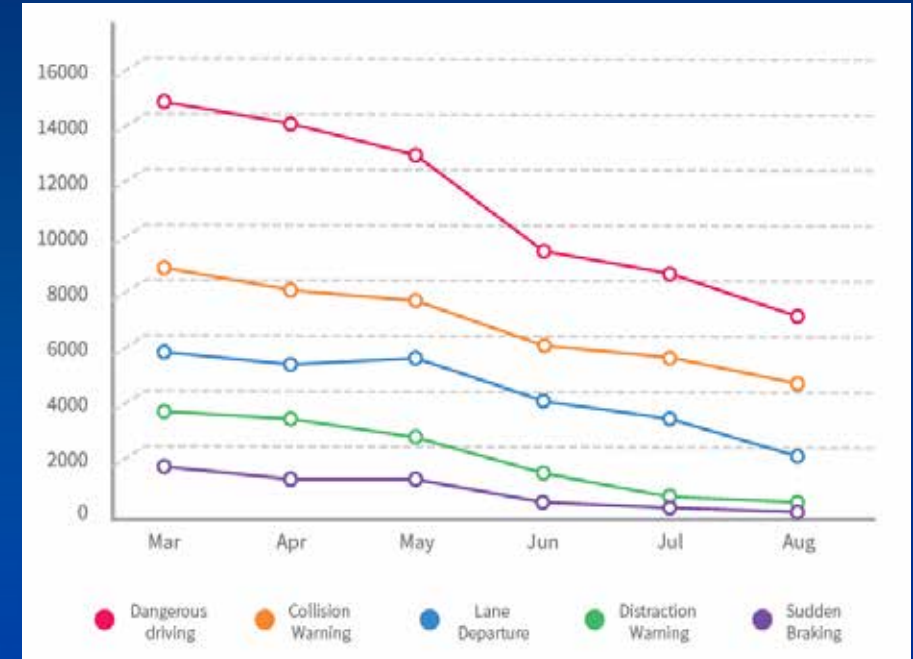

## Improve safety / ADAS

## ADAS(Advanced Driver Assistance System)

- Detect lane departure, avoid collision and lane keeping assist and distance detection by ADAS cameras
- When these behaviors happen ,our system will warn the driver and upload the alarm to the control center as evidence , eventually to decrease accidents

Driving behavior data analytical statement for one bus fleet

## Improve safety / BSD

### Blind Spot Detection

- Informs drivers of pedestrians and non-motor vehicles in blind spots.
- Indicates the proximity of items to the vehicle.
- Uses sound and light prompts to warn pedestrians.

## Improve safety / Reduce insurance charge

**24%**

**Reduction** in  
claims frequency

**40%**

**Cut** in claims costs

**100%**

**Increase** in  
annual insurance  
rebate

### Video evidence and AI can reduce Insurance charge

- Reduce false and fraudulent claims by having video evidence of exactly what happened.
- Fewer traffic accidents and fewer insurance claims , lower insurance charge next year

The screenshot displays the Mobile Center software interface. On the left, there is a sidebar with a file explorer showing video files. The main area is divided into several sections:

- Video Feeds:** A 2x2 grid of live video feeds. The top-left feed shows a driver inside a truck cab. The top-right feed shows a close-up of a road surface. The bottom-left feed shows a road from an elevated perspective. The bottom-right feed shows a white van driving on a road.
- Map:** A satellite map on the right side showing a location near a river. A black information popup is overlaid on the map, displaying:
  - 00111
  - 1002
  - 45.018419 South 0.161616
  - 120.136127, 30.200692
  - 2019-05-28 23:00:51
  - Online
- Alarm Log:** A table at the bottom center listing alarm events.
 

Alarm Source	Alarm Type	Alarm Time	Priority	Operation
washg001_7	Motion Detect	2019-06-21 19:43:52	High	View
washg001_7	Motion Detect	2019-06-21 18:43:59	High	View
washg001_7	Motion Detect	2019-06-21 18:43:54	High	View
washg001_7	Motion Detect	2019-06-21 18:44:41	High	View
washg001_7	Motion Detect	2019-06-21 18:44:00	High	View
washg001_7	Motion Detect	2019-06-21 18:43:44	High	View
washg001_7	Motion Detect	2019-06-21 18:43:58	High	View
washg001_7	Motion Detect	2019-06-21 18:43:57	High	View

## Rapid response for emergency

- Real-time alarm upload and manage based on GPS and audio talk, Remote playback and download full coverage HD video
- Through events such as Emergency button or E-fences, link to cut off fuel or power of the truck

## Cargo security / Cargo anti-theft

Trigger alarm and  
upload to control center

Door sensor to detect abnormal open  
/Magnetic door lock

E-fence

- Designate driving routes to prevent drivers from entering unsafe zones

## Cargo security / Oil tank truck

Trigger alarm and  
upload to control center

- Monitor the oil inlet and outlet of the oil tank
- Alert when somebody appear in abnormal areas(Climb up the oil tank or stand at the oil outlet)

### [ Achievement ]

- In 2017, Dahua deployed its **mobile** solution in about **5,300 vehicles** of China Post, providing remote monitoring, remote voice intercom, alarm pre-recording, track query, emergency alarm, etc.
- From 2019 year, they have asked Dahua to carry out intelligent upgrades, including **DSM, ADAS intelligence function**.

## Success cases / Kerry Logistics

### [ Achievement ]

- Deployed **Dahua mobile vehicle solution** in over **500 vehicles** during 2018, enabling them to do vehicle route management and driver management through interaction with the management center. It also supports government in monitoring these vehicles.
- Continues cooperation in phase 2 project from 2020 year , has deployed the solution **with DSM and ADAS**, the **statistics report** bring valuable information to **improve their management and customer's satisfaction** .
